PROFESSIONAL SUMMARY

Motivated Electronics and Communication Engineering (ECE) graduate (2026) from Sri Sai Ram College of Engineering with hands-on experience in Android App Development, Generative AI, IoT, AI/ML, Embedded Systems, and PCB Design. Completed a 3-month internship at MindMatrix, developing Android applications using Android Studio and GenAI technologies. Passionate about building innovative technology solutions with strong problem-solving, leadership, and communication skills.

EDUCATION

Bachelor of Engineering (B.E.) – Electronics and Communication Engineering

Sri SaiRam College of Engineering, Anekal-Bengaluru
2022 – 2026

12th, State Board

Holy Cross Matric Higher Secondary School, 80%

10th, State Board

Holy Cross Matric Higher Secondary School, 76%

SKILLS

- Networking (CCNA, CCNP)
 - Circuit Debugging
 - PCB Designing
 - IoT Development (Arduino, ESP32, Sensors Integration)
 - Machine Learning
-

INTERNSHIP EXPERIENCE

Company: MindMatrix

Android App Development Intern (GenAI)

Duration: 3 Months (During Academic Period)

MAJOR INTERNSHIP PROJECT

Arogya-Sahaya – Healthcare Assistance Application

- Developed Arogya-Sahaya, a healthcare-focused Android application using Android Studio and Generative AI to improve healthcare accessibility, medication adherence, and patient follow-up management.
 - Designed the application to support rural communities by enhancing healthcare awareness, communication, and access to healthcare assistance services.
-

PROJECTS

Smart Refrigerator System (IoT + AI/ML)

- Developed an IoT-enabled Smart Refrigerator using ESP32-CAM, integrating the Blynk App and OLED display for remote monitoring, notifications, and real-time food inventory tracking.
- Built an AI-powered Recipe Finder that generates meal recommendations, ingredient suggestions, and cooking instructions by combining AI/ML capabilities with IoT-based food management.

IoT Food Spoilage Detector

- Designed and developed a sensor-based food monitoring system using gas sensors and pH measurement techniques to detect food spoilage and enhance food safety.
 - Implemented buzzer, LED, and LCD alert mechanisms using embedded systems and sensor integration to reduce food wastage and provide real-time spoilage notifications.
-

WORKSHOPS CONDUCTED

Drawing and Artwork Workshop

Christ College, Malur

IoT and Machine Learning Workshop

Santhigiri College, Thodupuzha

CERTIFICATIONS

- Hack To Future 2.0 – St. Joseph's (2024)
- Altium Workshop – Altium Designer (2025)
- Circuit Debugging Workshop – EEE Department (2025)
- Cyber Security and Privacy – NPTEL (2025)
